

Primary and Behavioral Health Care Integration (PBHCI) Grants for Health Information Technology (HIT)

Program Specific Guidance for Cohort P-HIT1

- The 47 PBHCI-HIT grants will be entered into the system under a *new program and as new grants* using their current Grant ID with “-HIT” added to it (i.e.: SM59784-HIT). When a user with two grants logs in, they will have the option to choose the grant for which they want to enter data.
- PBHCI-HIT grants will only be set up to collect IPP indicators WD2, A1, and A3. As for the Annual Goals and Budget Information, they will need to specify goals and budget allotments for their funds in the PBCHI-HIT supplemental grant.
- PBHCI-HIT will not be collecting NOMs Client-level Measures (Services Activities) data.
